

# AEROSPACE INDUSTRY

Florida has a strong historical relationship with the aerospace industry. During World War II, the American government already chose Florida to train the pilots because of its sunny weather. Today, with one of the largest network of aerospace hubs centralizing the latest technologies, skills and research, Florida is a world ranked dynamic leader in the aerospace industry. The sunshine state is also renowned nationally and internationally for its commitment in the space race and its close ties with the NASA.

## Areas of Expertise

- Propulsion System
- Logistics
- Rockets and Spacecraft
- Flight Training
- MRO
- Navigation & Guidance System

## Workforce

Florida has the greatest engineering programs and research centers linked to the latest aerospace high technologies.

## Aerospace Companies

- Air France
- Airbus
- Dedienne
- Daher
- Embraer
- Latecohere
- Northrop Grumman
